CZI

GENERAL CONTRACTOR
Dome Construction

ARCHITECT
Page Southerland Page, Inc

DURATION
8 Months

COMPLETION DATE
March 2024

CONTRACT VALUE
\$1.4MM

PROJECT SUMMARY

This is a design assist TI project. The project involved modification of existing HVAC system to support the new lab spaces. The project included installation of process chiller on the roof with new exhaust fans and sound attenuation to meet project requirements. The construction in an existing building with limited overhead space for installation requirements of a Cryo EM microscope suite made construction challenging. The building space was shared with another tenant. The entire team was proactive in planning shutdown ahead of time to minimize disruption to adjacent space, nearby buildings and homes around the areas.
